MINIMAL STYLE MAXIMAL SECURITY

Unire in un'unica soluzione design minimale e curato in ogni dettaglio, eccellente isolamento termico e massima sicurezza anti-effrazione e/o anti-proiettile ad oggi era solo pura utopia. Dopo anni di ricerca, unite ad oltre venticinque anni di esperienza nella sicurezza passiva, *Ginko Safe Design* ha creato **IKONA**. Ingombri ridottissimi (soli 73 mm anta/telaio) grazie al sistema brevettato a "sormonto totale" con anta a scomparsa, **IKONA** è il nuovo punto di riferimento negli infissi di alta sicurezza. Personalizzabile con finiture RAL, ossidate, effetto legno e/o vero legno massello, **IKONA**, come tutti i prodotti *Ginko S.D.*, non richiede alcuna manutenzione nel tempo mantenendo invariato il funzionamento, la sicurezza e il suo stile unico.

EN

Creating a single solution that combines minimal design and great attention to detail, excellent thermal insulation and maximum anti-tamper security and / or anti-bullet protection - until today this was more a dream than a reality.

*After years of research and over twenty-five years of experience in passive safety, Ginko Safe Design has created **IKONA**.*

*Highly reduced dimensions (just 73 mm frame / vent) thanks to the patented system "total overlap" with a concealed door, **IKONA** is the new benchmark in high-security fixtures.*

*Customizable with RAL, oxidized, wood effect and / or natural wood finishes, **IKONA**, like all Ginko SD products, requires no maintenance over time, retaining its operational properties, safety and unique style.*

FR

Fusionner en une solution unique au design minimaliste et une grande attention aux détails, une excellente isolation thermique et une sécurité maximale anti-effraction et/ou anti-balles était jusqu'à aujourd'hui une pure utopie.

*Après des années de recherche et plus de vingt cinq ans d'expérience en matière de sécurité passive, Ginko Safe Design a créé **IKONA**. De dimensions très réduites (seulement 73 mm cadre/structure) grâce au système breveté à « recouvrement total » avec battants escamotables, **IKONA** est la nouvelle référence dans les châssis de haute sécurité.*

Personnalisable avec finitions RAL, oxydé, effet bois et/ou bois massif véritable, Ikona, comme tous les produits Ginko SD, ne nécessite aucun entretien conservant son fonctionnement, sa sécurité et son style unique au fil du temps.
